EVERY HUMAN BEING IS UNIQUE

Your body and your skin are unique and should benefit from a "tailor-made" treatment

"I wanted to bring together the profound and vibratory actions of essential oils in order to increase the vital energy of the organism and stimulate acupuncture points and thus rebalance the tissue, organic, visceral and emotional condition.

The combination of two ancient techniques, aromatherapy and Chinese medicine, allows individuals to be treated in their entirety and in a personalised manner in full respect of their differences, specificities and originality."

Presentation of the J.LIFT and J.LYMPH Natural Drain

Natural Drain is a 100% French machine, designed and produced following many years of research and practice at Josiane Laure institutes.

Natural Drain combines the action of J.LIFT & J.LYMPH, the perfect appliance for implementing your face and body treatments.

On its own, it combines all the anti-ageing treatments for the face and all the slimming treatments for the body.

Thanks to the J. LIFT "electropuncteur", the Natural Drain acts on the tone, suppleness and radiance of the face. The J.LIFT also acts on energy points adapted to body slimming and firming treatments, as well as on the scalp. All these treatments are completed by the action of the J.LYMPH suction pads.

Thanks to the J.LYMPH, the Natural Drain also fights fatty deposits, the slackening of tissue and the elimination of toxins with its lymph draining action.

The J.LIFT Electropuncteur

Through its combined electro-puncture and energy draining action the J.LIFT offers visible results from the very first session. This "facial gymnastics" technique restructures and firms tissue, helping to effectively reduce wrinkles, crows' feet, bags under the eyes and double chins.

More effective than digital pressure, the electric current controlled by the J.LIFT is particularly recommended for protecting the face from tissue slackening.

3 fundamental actions

1. Energy points

Technique based on the philosophy of Chinese medicine, it works

by the electrostimulation of specific points that have a precise action on all of the face and body (training recommended).

J. LIFT treatment probe

2. Facial gymnastics

For the face, each of these points also acts on muscular contraction and intense facial gymnastics reduces wrinkles to ensure radiance, tone and a fresh complexion.

3. Cell regeneration

Cell regeneration works thanks to the combined action of the “electropuncteur” and a mixture of Josiane Laure products.

THIS MIXTURE COMBINES 3 PRODUCTS

The **HYDRAVELOUR CREAM** (ivy, common horsetail and beeswax), an injection of genuine moisturising and pulping elements (sensitive skin); **ORGANIC JOJOBA CREAM**, genuine vegetable collagen that regenerates cells (normal skin).

The **PURIFYING GEL** (Laminaria seaweed, lavender, witch hazel), rich in mineral salts and a conductor for the active ingredients.

The **TONING SYNERGY** (mint, rosemary essential oils), a genuine lifting effect thanks to its action on the neuromuscular plaque (training on the use of the synergies recommended).

Example of a Josiane Laure Lift treatment

This anti-age treatment, based on Chinese philosophy, works via the electrostimulation of acupuncture points. The LIFT treatment involves facial gymnastics through the contraction of muscles, which acts effectively on the appearance of wrinkles, crows’ feet, bags under the eyes, double chins and the general slackening of the face’s definition.

It is also an excellent way to prepare for cosmetic surgery as well as for post-operation treatment. Acupuncture, an ancient Chinese

therapy, lies behind two techniques that we use in beauty treatments, energy draining and electropuncture.

- Flattening the tummy
- Lifting the buttocks
- Toning the breasts, the inside of the arms and the thighs
- Reducing "buffalo humps"
- Relaxing the back
- Lightening the legs
- Reducing wrinkles and refining the face

3 fundamental actions

1. Lympho-energy draining

This technique based on the philosophy of Chinese medicine and lymphatic draining works by sliding along the path of the meridian lines and the lymph (training recommended).

2. Slimming and toning

The J.LYMPH combats problems of swelling, fatty deposits and water retention. It helps to eliminate toxins and restores tissue tone and firmness thanks to its intermittent pumping action which works with suction pads adapted to the parts of the body to be treated.

3. Action of 3 essential oil gels and 3 synergies

Refine

The **ENERGY CREAM** (lavender, lemon ylang ylang) draining action.
The **FLASH M** (with 11 essential oils) specific action on fatty deposits.
The **ENERGY SYNERGY** or **ENERGY SYNERGY PLUS** (with essential oils) reinforcing.

Tone

The **ENERGY CREAM**.
The **TONING GEL** (mint, rosemary) action on the neuro-muscular plaque.
The **TONING SYNERGY** (with essential oils) reinforcing.

Drain

The **ENERGY CREAM**.
The **NORMALISING GEL** (lemon, lavender, ylang ylang) draining action.
